

# MASTERCLASS IN FACIAL ANATOMY AND DISSECTION

Facial Anatomy . Dissection . Cadaver

## Deepen Your Expertise: Facial Anatomy & Dissection for Safer, Smarter Practice

Accredited certificate from Canadian Academy of Cosmetic Surgery and Aesthetic Medicine

Experience the latest evidence-based curriculum, combining cutting-edge techniques with clinical case

Hands-On Cadaver Training for Confident Aesthetic Practice

2 nights free hotel stay in 4 star hotel

### COURSE HIGHLIGHT

- Comprehensive review of facial anatomy layers: skin, fat, muscles, nerves & vessels
- Cadaveric dissection for real hands-on learning
- Anatomy-based approach to injectables & fillers
- Safe techniques for botulinum toxin applications
- Understanding age-related anatomical changes
- Enhancing patient safety & treatment outcomes

### ABOUT THIS COURSE

The Masterclass in Facial Anatomy & Dissection Cadaver Course offers a unique hands-on learning experience designed for medical professionals in aesthetics. Through guided cadaveric dissections and expert-led lectures, participants gain an in-depth understanding of facial anatomy, danger zones, and age-related changes.

The course bridges theory with practice, ensuring safer and more precise aesthetic procedures with enhanced patient outcomes.

**Pdf Study Resources, Slides and videos of lectures upon Course Completion**

**Special Discount For Group of Doctors Registration**

**18 - 19 October, 2025**

**In-Person**

**6600 AED (1800 USD)**

**For Registration**

# MASTERCLASS IN FACIAL ANATOMY AND DISSECTION

Facial Anatomy . Dissection . Cadaver

**Deepen Your Expertise: Facial Anatomy & Dissection for Safer, Smarter Practice**

## COURSE MODULES

### Module 1: Introduction & Foundations

- Course overview and learning objectives
- Importance of anatomical knowledge in aesthetic medicine
- Patient safety and risk reduction strategies
- Ethical considerations and best practices in aesthetic procedures

### Module 2: Facial Anatomy in Depth

- Layers of the face: skin, subcutaneous fat, SMAS, muscles, nerves, and vasculature
- Vascular supply and venous drainage of the face
- Musculature and its role in facial expressions and movement
- Sensory and motor nerves of the face and their clinical relevance

### Module 3: Cadaveric Dissection – Hands-On Training

- Guided dissection of key facial regions: forehead, midface, periorbital, perioral, jawline, and neck
- Identification of anatomical danger zones
- Practical demonstration of safe injection planes
- Hands-on experience with tissue layers and anatomical structures

### Module 4: Aesthetic Applications & Techniques

- Anatomy-based approach to dermal fillers and volumization
- Botulinum toxin injection points and safety considerations
- Managing common complications: vascular occlusion, asymmetry, bruising
- Case studies on anatomy-guided treatments

### Module 5: Age-Related Changes in Facial Anatomy

- Structural and volumetric changes over time
- Understanding skin laxity, fat pad shifts, and bone resorption
- Adapting aesthetic techniques to different age groups for natural outcomes

### Module 6: Complication Management & Risk Prevention

- Recognizing early warning signs of complications
- Emergency protocols and best practices
- Evidence-based approaches to avoid high-risk zones
- Interactive discussion on real-world complication cases

## WHY TO ATTEND

- Demonstrate a comprehensive understanding of facial anatomy relevant to aesthetics
- Accurately identify key anatomical landmarks and high-risk areas
- Apply knowledge of anatomy to optimize filler and botulinum toxin treatments
- Implement safer techniques for injectables to reduce complications
- Recognize and manage potential complications with evidence-based strategies
- Adapt aesthetic approaches based on age-related anatomical changes
- Integrate cadaveric dissection insights into daily clinical practice

## WHO SHOULD ATTEND

- Aesthetic physicians and practitioners
- Dermatologists specializing in cosmetic procedures
- Plastic and reconstructive surgeons
- Maxillofacial surgeons
- Otolaryngologists (ENT specialists) involved in facial aesthetics
- Residents and fellows in dermatology, plastic surgery, and related specialties
- Medical professionals seeking to expand their expertise in safe aesthetic practice
