

HANDS-ON MASTERCLASS IN OBSTETRIC & GYNECOLOGIC ULTRASOUND

2-Day Intensive Hands-On Training | Live Scanning + Practical Learning

Master Clinical Ultrasound Skills & Perform Confident OB-GYN Scans in Your Practice

- ◆ Learn ultrasound basics, machine settings & image optimization
- ◆ Master pelvic ultrasound & gynecologic evaluation
- ◆ Perform early pregnancy ultrasound with confidence
- ◆ Understand fetal growth assessment & monitoring
- ◆ Learn follicular tracking & infertility ultrasound protocols
- ◆ Hands-on ultrasound scanning under expert supervision

COURSE HIGHLIGHTS

- Practical ultrasound training with real-time scanning
- Step-by-step scanning protocols for daily clinical use
- Transabdominal & transvaginal ultrasound techniques
- Early pregnancy & fetal assessment
- Pelvic pathology identification
- Follicular monitoring & fertility applications
- Live demonstrations + hands-on practice

ABOUT THIS COURSE

This hands-on masterclass is designed for doctors who want to confidently perform obstetric and gynecologic ultrasound in clinical practice.

- Focus on practical scanning & real clinical application
- Learn essential ultrasound skills in just one day
- Gain confidence in diagnosis and patient management

Accredited Certification | International Faculty | Real Patient Training

- 2-Day Intensive Hands-On Training
- Live ultrasound demonstrations + practice
- Small group learning for better hands-on experience

- Secure Your Seat Today
- Limited Hands-On Slots

 12 - 13 Sep, 2026  Karachi

 10 - 11 Oct, 2026  Lahore

HANDS-ON MASTERCLASS IN OBSTETRIC & GYNECOLOGIC ULTRASOUND

2-Day Intensive Hands-On Training | Live Scanning + Practical Learning

COURSE MODULES

Module 1: Ultrasound Fundamentals

- Ultrasound principles & machine settings
- Probe selection & image optimization
- Safety guidelines & scanning protocols
- Transabdominal vs transvaginal techniques

Module 2: Pelvic Ultrasound

- Uterus & endometrial evaluation
- Ovarian anatomy & follicular development
- Ovarian cysts & adnexal masses
- Fibroids & uterine abnormalities

Module 3: Early Pregnancy Ultrasound

- Confirming intrauterine pregnancy
- Gestational sac & fetal pole
- Crown-rump length (CRL)
- Viability assessment

Module 4: Fetal Growth Monitoring

- Basic fetal biometry
- Placental assessment
- Amniotic fluid evaluation
- Monitoring fetal development

Module 5: Infertility & Follicular Monitoring

- Transvaginal ultrasound for fertility
- Follicular tracking protocols
- Endometrial thickness assessment
- Ovulation tracking

Module 6: Hands-On Scanning & Case Discussion

- Live ultrasound demonstrations
- Practical scanning techniques
- Image interpretation
- Case-based clinical decision making

WHY JOIN THIS MASTERCLASS

- Learn essential ultrasound skills for daily practice
- Hands-on training with expert supervision
- Practical, real-world scanning protocols
- Immediate implementation in your clinic
- Improve diagnostic accuracy & patient care

WHO SHOULD ATTEND

- Gynecologists
- Obstetricians
- General Physicians
- Radiology trainees
- Doctors interested in ultrasound practice
